ACADEMICS

For more than a century, Balmoral Hall School has been committed to empowering girls to pursue their dreams. Rigorous teaching prepares our students for academic excellence. Our students are risk-takers, their curiosity is insatiable, and most importantly, they rise to challenges.

Our education model is reflective of our vision, mission, and values and allows us to provide a personalized program that is rigorous, relevant, and research based and by providing programming allowing our students to be prepared for their future education.

The focus on the development of "STEAM" skills is much more than a focus on science, technology, engineering and math, but is a program that values innovation and focuses on an inquiry-driven, student-centered approach to learning (problem-based). To ensure that innovation and creativity are valued, arts are integrated into each of the "STEM" subjects.
