About the Cowichan Valley

Located halfway between Nanaimo and Victoria, the Cowichan Valley is a community nestled on Vancouver Island and is known for its ocean beaches, thick forests, clean and beautiful lakes, scenic rivers, streams, mountains, and rolling farmlands.

Regardless of where you travel within the region, wildlife is within your vision. Whether you prefer to fish, scuba dive, hike, windsurf or kayak, each of these activities will present a unique opportunity to experience a wide range of natural wildlife.

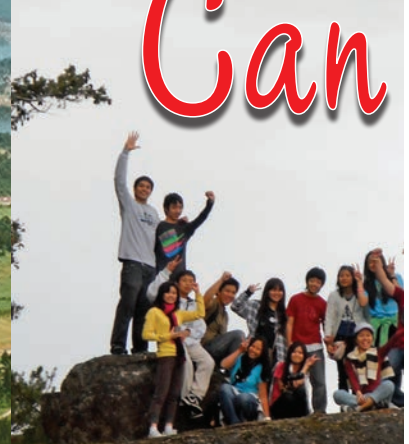

The Vancouver Island region has the most moderate climate in Canada making it an ideal destination year round. As a response to the mild winters, beautiful spring growth, and long dry summers, the Cowichan Valley has become a desired location to raise families and/or to retire.

The Cowichan Valley is a unique, busy community. It offers opportunities for both young and old in a safe, strong community.
